Personal Training Activities

1.1 OVERVIEW.

Thank-you Bob. Good evening to everyone. Tonight, I'll be discussing Individual on-line self-paced training. This type of training allows users to learn about ACS/ARES®, emergency communications, and how ACS fits into the larger emergency management picture. I'll provide a brief overview of two on-line training sites and the recommended training courses.

- a. Federal Emergency Management Agency (FEMA) Emergency Management Institute (EMI) – Independent Study Program
- b. ARRL On-line Training

The information I'll be presenting on both topics has by and large been copied from the FEMA EMI and ARRL training websites.

1.2 FEMA EMI INDEPENDENT STUDY PROGRAM – OVERVIEW

The Independent Study Program (ISP) is a distance learning program offered free of charge to the American public. It serves as both an alternate means to deliver valuable training to the professional and volunteer emergency management community, and an opportunity to improve public awareness and promote disaster preparedness nationally. Classes are self-paced, and individuals can login, download course material, and participate in the class from their home or work computer.

To sign up for training, each user will first need to obtain a Federal Emergency Management Agency (FEMA) Student ID number. The emergency operations training page of the Pinellas ACS website includes a link to the FEMA website needed to obtain a FEMA student ID. Once you have the student ID, you can go to the FEMA Independent Study Program website and select a course. At the conclusion of the course, you'll be asked to take a final exam, and once passed, you'll receive a certificate of completion from FEMA.

1.2.1 Pinellas ACS Requirements

Pinellas ACS has identified a subset of FEMA courses that the membership should complete before assignment to an evacuation shelter or the Pinellas Emergency Operations Center (EOC).

- a. IS 100 Introduction to the Incident Command System
- b. IS 200 Basic Incident Command System for Initial Response
- c. IS 700 Overview of the National Incident Management System (NIMS)
- d. IS 800 An Introductions to the National Response Framework

1.2.1.1 IS 100 - Course Overview

IS 100, Introduction to the Incident Command System, introduces the Incident Command System (ICS) and provides the foundation for higher level ICS training. This course describes the history, features and principles, and organizational structure of the Incident Command System. It also explains the relationship between ICS and the National Incident Management System (NIMS).

- a. No Prerequisites
- b. Course Duration – 2Hrs

1.2.1.2 IS 200 – Course Overview

IS200, Basic Incident Command System for Initial Response, reviews the Incident Command System (ICS), provides the context for ICS within initial response, and supports higher level ICS training. This course provides training on, and resources for, personnel who are likely to assume a supervisory position within ICS.

- a. Prerequisites – IS 100
- b. Course Duration – 4 Hrs

1.2.1.3 IS 700 Course Overview

This course provides an overview of the National Incident Management System (NIMS). The National Incident Management System defines the comprehensive approach guiding the whole

community - all levels of government, nongovernmental organizations (NGO), and the private sector - to work together seamlessly to prevent, protect against, mitigate, respond to, and recover from the effects of incidents. The course provides learners with a basic understanding of NIMS concepts, principles, and components.

- a. Prerequisites – NONE
- b. Course Duration – 3.5 Hrs

1.2.1.4 IS 800 Course Overview

The goal of the IS-0800.d, National Response Framework, An Introduction, is to provide guidance for the whole community. Within this broad audience, the National Response Framework focuses especially on those who are involved in delivering and applying the response core capabilities.

- a. Prerequisites – IS 700
- b. Course Duration – 3 Hrs

The total duration for the four courses is approximately 12.5 hours; however, this is a very conservative estimate. Individuals can certainly complete the training in less time.

1.3 ARRL ON-LINE TRAINING – EC-001: INTRODUCTION TO EMERGENCY COMMUNICATION

This course is designed to provide basic knowledge and tools for any emergency communications volunteer. The course has six sections with twenty-eight lesson topics, and includes a selection of student activities, knowledge review quizzes, and a final assessment. The course is conducted entirely online and can be completed at your own pace, allowing you to work according to your own schedule.

- a. Prerequisites – IS 100 and IS 700
- b. Course Duration – Suggested timeline 9 weeks. But, as with the FEMA training, it all depends on how long you want to spend each week.

1.4 QUESTIONS OR COMMENTS.

I'd like to pause here for a minute and ask if anyone has a comment or question about tonight's presentation. If you have a comment or question, please provide me with your call sign, slowly, clearly, and phonetically so I don't make a mistake when I respond. And then ask your question or provide me with your comment.

This is WA1RYQ.

ACTION - PAUSING FOR QUESTIONS

1.5 CONCLUSION.

That's all I have for this week's training session. Let me conclude with a couple of reminders.

1. There is no Winlink training this week. The next Winlink Training net is scheduled for Wednesday, March 16th, at 1930 hours local. This will be a mixed voice and data net with the voice segment taking place on the W4ACS repeater. A Winlink bulletin describing the planned net activities will be sent to all registered Winlink participants on Monday March 14th. A copy of the bulletin will also be posted on the Pinellas ACS Website.
2. I strongly encourage everyone to provide comments and suggestions for future training activities. I can be contacted at WA1RYQ@ARRL.net.

Now with that, I'll turn it back to Net Control.

Pinellas ACS/ARES® Training Net – March 8th, 2022

1.6 QUESTIONS AND COMMENTS.

The following table contains a summary of the comments and questions provided by the membership during the presentation.

No.	Call Sign	Comments	Response
1	W8QFV	Great presentation. Good Job.	
2	N4BCK	What is the life span of the FEMA Independent study classes? Several times when I have logged onto SERTrac, I have found that a newer version of a class I previously completed is required as a prerequisite to a follow-on course.	Unfortunately, I do not have an answer to that question. I am aware that several individuals have also encountered this problem.
3	KC4SXO	The courses discussed in tonight's presentation are the prerequisite courses needed for many of the more advanced courses.	That is correct. AUXCOMM required all 4 of the IS courses mentioned in tonight's brief and the ARRL course requires 2 of the four.
4	N2KBD	Is the ARRL course free?	To the best of my knowledge, it is free. I am an ARRL member and know that I was not charged to take the course.
5	KO4JUI	I am also a member of the ARRL, I did take that course, and there was no charge.	
		No other questions or comments
